## Upper Missouri River Reservoir Fisheries Management Plan–2010-19 Citizen Workgroup Nomination Form

### Purpose

To lead the effort to identify, define, and recommend fish management alternatives related to the Upper Missouri River Reservoir System. Since 2000 the Upper Missouri River Reservoir Fisheries Management Plan has provided the framework for monitoring and evaluating fisheries management on Canyon Ferry, Hauser and Holter reservoirs and the river sections below the dams. Recommendations by the workgroup will be considered for the new fisheries management plan.

### Guiding Principles

- The Upper Missouri River angling and recreation community includes warm - and coldwater anglers, ice-fishing anglers, fisheries managers, outfitters, public-land managers, private landowners, local businesses, local governments, and other interests.
- Montana's fisheries are held in trust by the State of Montana for the enjoyment of all.
- The Upper Missouri River's three-reservoir system is to be managed as a high-quality, cost-effective, multi-species fishery with high levels of angler satisfaction.
